Education

SULEYMAN DEMIREL UNIVERSITY

Bachelor of Science in Computer Engineering GPA: 3.14/4.00

Isparta, Türkiye

Expected August 2026

Experience

IAS (Canias ERP)

Istanbul, Türkiye

IoT Intern

July 2026 – Present

- Developed an Event-Driven Parking Automation system utilizing Node.js, Express, and Supabase (PostgreSQL), containerized with Docker and integrated with Mosquitto MQTT broker.
- Engineered an Industrial IoT (IIoT) real-time monitoring system to track machine metrics (OEE) using Siemens S7-1200 PLC, OPC UA protocol, Node-RED, InfluxDB (Time-Series DB), and Grafana.
- Gained hands-on experience in enterprise resource planning (ERP) development with TROIA, including relational database design, OOP architecture, dialog UI, and section reporting.

SDU FACULTY OF ECONOMICS AND ADMINISTRATIVE SCIENCES

Isparta, Türkiye

IT Technician

October 2025 – June 2026

- Orchestrate daily IT operations, providing comprehensive technical support for 200+ faculty staff and maintaining hardware/software integrity across 5 computer laboratories.
- Troubleshoot network connectivity issues and maintain LAN integrity across departments.
- Configure and deploy operating systems and essential enterprise software for institutional workstations.

HAUS MAKINA SAN. TIC. A.S.

Aydın, Türkiye

IT & Systems Intern

July 2025 – August 2025

- Built a specialized lab environment using VMware to simulate network configurations and application deployments on Linux and Windows Server.
- Developed a unified React-based dashboard to integrate monitoring data from OpManager and Sensibo, successfully deploying it to streamline real-time system oversight.

Leadership and Activities

SDU Computer Society

Isparta, Türkiye

Member of Management Board

February 2025 – Present

- Organize BİLTEK (Bilişim ve Teknoloji Zirvesi), coordinating with industry experts and C-level speakers to host technology seminars for 200+ students.
- Conduct hands-on Git & GitHub training sessions for junior students, covering version control best practices and collaborative workflow management.
- Collaborate within the Events Department to bridge the gap between academic theory and industry requirements through technical workshops.

Technical Project

Home Healthcare Tracking System (Senior Design Project)

October 2025 – June 2026

- System Architecture:** Design a full-stack health monitoring infrastructure integrating a Flutter mobile application with a secure web management panel.
- Data Management:** Implement real-time data synchronization and secure storage protocols for sensitive patient information.
- Infrastructure & Performance:** Focus on high availability and low latency communication between the edge devices and the central server.

Skills

Systems & Virtualization: Linux, Windows Server, VMware, Docker.

Network Fundamentals: Understanding of TCP/IP suite, DHCP/DNS configurations, and basic LAN troubleshooting.

IoT & Development: MQTT, Canias ERP, TROIA.

IT Operations: Hardware Assembly, System Diagnostics, Technical Support & Maintenance.

Tools & Database: Git & GitHub, SQL.

Languages: Turkish (Native), English (B2).
