Career Objective

During my academic journey, I have developed personal skills such as research, self-motivation, and entrepreneurship. In addition to formal education, I have prepared myself for the future through individual studies. My goal is to work in a reputable company that allows me to further develop my creativity and technical abilities.

Work Experience

Robotics Intern – TİTRA Technology, Ankara
June 2025 – August 2025 (40 business days)

- *Developed publisher/subscriber, service, and action - structures in Python using ROS2 Humble.
- *Designed robotic applications in simulation environments with TF2, RViz, and launch files.
- *Set up Docker-based environments for PX4, MAVROS, and ROS2 projects.
- *Conducted UAV simulations using PX4, MAVLink, Gazebo, and QGroundControl.
- *Observed hardware integration and real-time system transitions.

Almena Hotel Marmaris 2022

My first work experience, where I gained proficiency in hotel management software and customer relations.

Strengths

- *Multitasking
- *Critical thinking
- *Team motivation
- *Business relationship development
- *Budget planning and management
- *Lifelong learning and self-development
- *Persuasion skills
- *Flexibility and adaptability
- *Crisis management and accountability
