About Me

I have been working on mobile application development for the last 3 years. After gaining experience on the Android platform for the first few months, I decided to pursue cross-platform development with Flutter. I continuously develop projects and experiment with different technologies to enhance my knowledge and skills. As a team-oriented developer, I value collaboration and effective communication within the team. My goal is to build a successful career by utilizing my knowledge and experience in mobile application development.

Education

Computer Engineering 2.99/4
Süleyman Demirel University 2021 – 2025

Skills

- Flutter
- Dart
- iOS
- Android
- Bloc
- Riverpod
- Firebase
- RestApi
- Git and GitHub
- Figma
- OOP
- ClickUp

Experience

CatchPad – Flutter Developer

May 2025 – Present 2026 – Remote

I directly contributed to an enterprise mobile application project developed with Flutter. I took active roles in various areas, from coding new features to API integrations, from implementing UI designs to bug fixing, and from publishing new versions of the application on App Store and Play Store.

PITON Technology – Mobile Application Developer Intern

July – August 2024 – Eskisehir

During the internship, I worked on various projects using Flutter. I particularly focused on integrating designs with code, API integrations, data management with Firebase, and user authentication processes. I adapted to teamwork and strengthened my application development skills by learning best practices in the software development process.

Projects

Avo AI Diet (Gemini AI)

Creates AI-powered personalized diet lists based on the user's physical characteristics. It offers features such as chat functionality, receiving regional weight loss recommendations, daily calorie tracking, and caching favorite diets.

- Flutter • Firebase AI • Bloc • Flutter Local Notification • Go Router

Film Oasis

This application developed with TMDB API is a movie application where users can discover and track newly released movies.

- Flutter • Riverpod • Dio • Hive • Auto Route • Localizations

Task Track(Play Store'da) [Play Store ->](#)

A task management application that offers task creation and editing, categorization, and priority setting features. I provided user profile management, real-time data synchronization with Firebase, and push notifications.

- Flutter • Firebase Auth • Firestore • Firebase Messaging • Riverpod

Book Store App

A book store where users can search books within the application, list them, and read their details.

- Flutter • Provider • Dio • Flutter Hooks • Autor Route

Nike UI Clone

As part of the App Innovators Mobile Dev Journey Bootcamp final project, I cloned Nike's user interface prepared on Figma pixel-perfectly with Flutter.

- Flutter • Responsive • Localizations
