EDUCATION

Computer Engineering

Süleyman Demirel University

10/2021 - Present

Isparta

WORK EXPERIENCE

Intern

Isparta Cyber Security Application and Research Center

07/2023 - 09/2023

Isparta

My reference: Ahmet Ali Süzen (internship supervisor)

Achievements/Tasks

- I had a very productive hardware internship at Isparta Cyber Security Application and Research Center and gained a lot of new information. The time I spent here for 20 days enabled me to gain good experiences.

Vice President

Computer Society

10/2023 - 03/2024

Isparta

My reference: Muhammed Maruf Öztürk (community advisor)

Achievements/Tasks

- I am the vice president of Süleyman Demirel University Computer Society, which helps me improve my human relations. I have improved many of my skills such as public speaking and I am also a good teammate, so I did not have any difficulties during the adaptation process.

President

Computer Society

03/2024 - Present

Isparta

My reference: Muhammed Maruf Öztürk (community advisor)

Achievements/Tasks

- I am the president of Süleyman Demirel University Computer Society. I have improved many of my skills such as public speaking and I am also a good teammate. I am still continuing in this role.

Intern

Turkey Football Federation

07/2024 - 08/2024

Istanbul

My reference: Ali Gümüş (internship supervisor and TFF IT Director), Bostan Kuru (TFF system manager), Süha Gökmen (TFF technology manager)

Achievements/Tasks

- I had a very productive software internship at the Turkish Football Federation and gained a lot of new knowledge. During the 20-day period I spent here, I worked on a mobile project and a web project. This process allowed me to gain very good experiences.

SKILLS

Team Leadership

C/C++/C#

Teamwork

Python

Java

Flutter

Object-Oriented Programming (OOP)

Cyber Security

SQL

ASP.NET

UI/UX Design

PERSONAL PROJECTS

WriteReadLearn Mobil App (03/2024 - 05/2024)

- Medium clone app

Obstacle Avoiding Car with Arduino (04/2024 - 03/2024)

- I created an obstacle-avoiding car project using an Arduino Uno board, programmed through the Arduino IDE. The vehicle is equipped with ultrasonic sensors to detect obstacles and a Bluetooth module for remote control.

ORGANIZATIONS

PİBEX (03/2024)

I took part in the idea marathon held on March 21-22-23, 2024 as a member of the organizing committee

GDSC SDU DevFest (12/2023)

On December 26, 2023, I took part in the DevFest event as an organizer

PİBEX 2 (12/2024)

I took part in the idea marathon held on 5-6-7 December, 2024 as a member of the organizing committee

CERTIFICATES

Advanced Cyber Security (02/2022 - 10/2022)
