

Yüksel Coşgun – Software Engineer

- +90 540 124 0105 | +90 507 822 7423
- yukselcosgun1@gmail.com
- Turgut Özal Mahallesi, Yenimahalle / Ankara
- GitHub: github.com/Yukselcsgn | LinkedIn: linkedin.com/in/yuksel-cosgun

■ Skills

- Programming: Python (Data Engineering, AI), Java (Backend), JavaScript-TypeScript, Kotlin (Android), SQL, NoSQL
- Tools & Frameworks: Spring Boot, Selenium, React Native, Docker, Jenkins, pandas, numpy, sklearn
- Areas: Backend Development, Machine Learning, Data Analysis, Decision Support Systems
- Languages: Turkish (C2), English (B2)

■ Education

- Süleyman Demirel University – Computer Engineering (2019–2025)
- Member & Leader of Computer Society(2022-2023)
 - Supervisory Board Member (2023–2024)

■ Experience

Microsoft – Turkey (Intern, July–September 2024)

- I created three separate AI/ML projects: credit card fraud detection, stock price analysis, and analysis of ancient languages, and presented these projects to my internship advisor.

■ Projects

- Dynamic Web Scraper:
 - I developed a dynamic scraping system that automatically adapts to different e-commerce sites.
 - I added proxy management, user simulation, and dynamic selector detection features.
 - Built with Selenium, BeautifulSoup, WebDriver-Manager, pandas; supports proxy management,
- Autonomous Car Sharing System: Finalist at TÜBİTAK 2209-A and Teknofest competitions.
- Social Media Platform: Cross-platform mobile app using React Native (Graduation project).
- AI Projects:
 - US stock price prediction
 - Credit card fraud detection
 - Deciphering unknown ancient alphabet via AI models

■ Certificates

- Turkcell Geleceği Yazarlar – Android 101/201/301
- Turkcell – Data Science & AI Intro
- BTK Akademi – Jenkins, Docker, Blockchain, DoS/DDoS Protection, Digital Awareness
