## Personal Projects

---

**AI-Powered Cross-Platform Mobile App (Safeway AI) (Present)** | *React Native, NodeJS, Expo, TensorFlow*

- Built a cross-platform application using React Native, and Expo.
- Implemented custom API endpoints and integrated them with the NodeJS backend to ensure seamless data flow.
- Integrated asynchronous data storage seamlessly into the app's architecture.
- The application is a driving safety app that operates on mobile devices. It uses an AI model to perform real-time analysis during driving and provides visual and auditory alerts to the driver when detecting fatigue, drowsiness, or other behaviors that may compromise driving safety.

**2D Mobile Game** | *Kotlin*

- Developed a 2D mobile game in Kotlin focused on course completion and educational progression.
- Designed and implemented interactive levels where users complete tasks to unlock new modules.
- Integrated local data storage using Room to track user progress and game state persistently.
- Applied clean architecture principles to separate UI, business logic, and data layers for maintainability and scalability.
